

Each bucket always clean

“Finlays felt manual bucket washing needed to be upgraded to improve the standard of bucket hygiene, create labour efficiencies and minimize water usage. The Limex machine was installed in 2012 and has had a very positive impact on the operation. Tests show consistently cleaner buckets, free of bacteria.

We now have a reliable, durable and sustainable machine which works at each individual bucket.”

Marcus Keane
General manager Finlays Kericho

Finlays is one of the world largest flower producers and packers. All production and processing is accredited to Fairtrade standards and every farm is Kenya Flower Council Gold standard and GLOBALGAP certified. They are at the forefront of environmentally sustainable farming practices and aim to minimise water use and recycling wherever possible.

Limex is the market leader in crate and bucket washing solutions. UFO SUPPLIES is happy to represent companies like Limex and is confident that their machines are a good solution for many other flower farms worldwide.
